

FALCONBOARD®
Stronger. Flatter. Greener. Better.™

MOUNT

The **green** backing board for **demanding display** applications

Falconboard® Mount from Hexacomb is a paper-based backing board which is structurally engineered for demanding roll media and retail displays. It is a green choice over petroleum-based products because it is made primarily from renewable forest resources and is completely recyclable*.

Falconboard® Mount is designed as a strong, non-petroleum-based option for off-set litho and flexographic printed flexible wide-web materials. Its structural characteristics, strong, flat and rigid, enable improved performance compared to both foam board and corrugated.

Falconboard® Mount is engineered for the strength required for large 3D structures. Its natural kraft liner and core is ideal for temporary and semi-permanent point-of-purchase retail applications.

This unique backing board can handle the most demanding of graphic display requirements due to its high rigidity and dimensional stability

PERFORMANCE

- Excellent compression strength structure
- Highly flat and smooth surface
- High rigidity and dimensional stability
- Lightweight but exceptionally strong
- Durable: scratch and warp resistant
- Improved visual impact underlying cell not visible after lamination
- Withstands the weight of heavy products
- Tough core resists denting

VERSATILITY

- Custom sizes available
- Works well with most inks and adhesives
- Works with most commercial connective systems such as edge tape and plastic or metal edging or channels
- Use and reuse for multiple functions
- Well-suited for a diverse range of applications and fabrication
- Aesthetically pleasing appearance
- Easy-to-use and store

SUSTAINABILITY

- Excellent alternative to traditional foam boards made from polyethylene (PE), polystyrene (PS) or polyvinylchloride (PVC)
- Made with SFI** certified, all natural, renewable virgin and post-consumer recycled fibers
- Completely recyclable*
- Renewable and reusable
- Promotes closed loop recycling
- Lessens dependence on petroleum-based resins
- Lessens landfill waste
- Baler friendly
- Recyclable with corrugated waste*
- Increases corporate environmental responsibility and stewardship

Made in the USA

*Check your area's corrugated paperboard recycling policy.

**SFI certification in North America only. Sustainable Forestry Initiative® and SFI® are registered trademarks of SFI Inc.
